ABOUT ME

I am a full self-taught developer looking for new professional opportunities. Good knowledge of JavaScript (React), TypeScript, HTML and CSS, I want to improve every day. I am very organized, responsible, hardworking, punctual, honest, communicative, able to work in a team. In addition, I quickly learn new information and easily adapt to any changes or requirements at work. In general, I have experience that I have gained by learning new technologies. I was also interested in how companies work in general. I read books about people's success, such as "Think and Grow Rich" and others. I also have commercial programming experience, about 1 year as a Fullstack Developer

EXPERIENCE

Fullstack Developer at ArtCodeVision (June 2022 - September 1)

Tech Stack: Html, Css, Typescript, React, Redux, Node.js, Exp MySql, Docker
Tools: Figma, GitHub, WebStorm, IntelijIdea
Task: Layout of new pages, refactoring of old code and fixing bugs, writing of pagination and reusable components, creation of new tables, columns in the database, refactoring and integration for stripe, migration of users from Auth0 databases, production launch, integration of Apple payment and Klarna payment.

Fullstack Engineer at Altitude Development Partners (August 15 - Present)

Tech Stack: Html, Css, Typescript, React, Redux, Expo, React Native
Tools: Figma, GitHub, WebStorm, IntelijIdea
Task: At the moment, we are writing an application using Google and Apple maps. That's why I create animations, make adaptive layouts, write requests for the backend. I also use firebase.

Mentor at SkillUp (October 2022 - April 2023)

It was my side job. The essence of this work was to check homework in Html, Css, JavaScript and React. I also provided study tips and useful resources.
